THE BEST TRIPS START WITH UNPRECEDENTED COMFORT.

BODRUM _____

The General Aviation Terminal is situated on a 1,234 square meter site to the east of Milas Bodrum Airport International Terminal. Popular with global celebrities visiting Bodrum and its vicinity, particularly for summer holidays, Bodrum Terminal is one of our special gateways to the historical and natural attractions of the Aegean Region. Offering all kinds of comfort, the Domestic Terminal has one departures/arrivals hall, while the International Terminal includes halls each reserved for arrivals, departures, and waiting as used by teams or people welcoming or seeing off their loved ones, making for four separate halls in total.

Security, customs and passport procedures can be performed without long queues at the General Aviation Terminal.

As the prominent feature of the terminal, these services will help passengers to save time while traveling either by private jet or with airlines. Our guests are welcome to enjoy comfort and quality in our specially designed quiet lounges, escaping crowds and noise, before boarding at the terminal. Passengers can continue working at our lounges thanks to Wi-Fi Internet access available across the terminal, watch the news on TV, or enjoy complimentary food and drinks served by our experienced staff.

As the portal to Bodrum for prominent figures in economy, business, culture and sports, the General Aviation Hall is Bodrum's most exclusive gateway to the world.
